Sales Strategy for Integrated Spaces Ltd.

1. The Bottleneck: Predictable Lead Generation

Integrated Spaces Ltd. has **grown through referrals**, but this has created a "waiting game." Without a documented process, it is impossible to hire someone else to do the selling. The biggest challenge right now isn't a lack of talent: it's not knowing exactly **where to start** to build a predictable flow of new customers.

2. The Solution: A Practical Sales Manual

This 2-week engagement (The DT Blueprint) provides the "Day 1" instructions. We are building a step-by-step guide that allows the founder to stop being the only salesperson and start being the manager of a sales process.

3. The 14-Day Timeline (Getting Started)

We move from "where do we start" to a "ready-to-run" plan in two phases:

- **Phase 1: Removing the Guesswork (Days 1–7)**
  - **The Target:** We define exactly who we are going after, so no time is wasted on the wrong leads.
  - **The Filter:** We create a qualification checklist to quickly identify if a prospect is worth your time.
  - **The Flow:** We map out the 4 or 5 steps a lead must take to go from a stranger to a customer.

- **Phase 2: Creating the "Action Kit" (Days 8–14)**
  - **What to Say:** We write the scripts and messages for outreach so you aren't starting from a blank page.
  - **The Competitive Edge:** We document exactly why you are better than competitors, giving the sales team the confidence to handle objections.

4. The Handover: Ready-to-Use Templates

At the end of Week 2, we provide a "Plug-and-Play" folder for the execution model that fits your budget:

- **Field Sales Path:** JDs, interview questions, and daily report templates for an on-ground salesperson.
- **Telecalling Path:** Call scripts and lead-tracking sheets for a phone-based team.
- **Digital Agency Path:** A vetting guide and performance scorecard to help you hire an external agency.

5. Project Scope: This is a Strategy & Setup service: We build the blueprints and the "How-To" guides.
This is NOT Execution: We do not provide the staff, run the ads, or make the calls. We give you the system so *you* (or your new hire) can do it correctly.

6. Investment Breakdown: A factual list of the hours and rates for the consultants involved shows Rs50,000 as the price for the services. DT is happy to offer the service to Integrated Spaces Ltd at a 50% discount, at a price of Rs25000, to initiate the relationship.

Annexure A: Execution Blueprint

This is just a sample to illustrate the deliverables. The final execution blueprint would be developed after the initial research.

1. The Hiring Kit: To alleviate the "Where do I start" pain, we plan the requirements for your first hire.

- **Job Description (JD):** Focused on "Hunter" profiles: people comfortable with cold-approach and site visits in the [Specific Segment] identified in Week 1.
- **Compensation Logic:** A breakdown of base salary vs. performance incentives tied to "Qualified Leads".
- **Interview Rubric:** 5 specific questions to test if the candidate can handle the "Non-Referral" objection.

2. The Lead Generation SOP: Since we aren't waiting for referrals, the team needs a list of people to call.

- **Sourcing Channels:** Step-by-step guide on extracting leads from platforms like LinkedIn, Google Maps, or Industry Directories.
- **The "Vetting" Filter:** A 3-point checklist for your Business Analyst to ensure a lead is "High Potential" before passing it to Sales.

3. The Communication Kit: We provide the exact scripts so the new hire doesn't have to "guess" how to represent Integrated Spaces.

- **The "Cold" Opening:** A 30-second script for phone or in-person introductions that focuses on a specific pain point (e.g., "Most firms in your sector struggle with X...").
- **The Objection Handler:** Prepared responses for the common "We already have a vendor" or "We only work with people we know" pushback.

4. The Management Dashboard: You cannot manage what you do not measure. We provide a simple template (Excel/CRM) to track:

- **Daily Input:** Number of new leads sourced vs. number of first-meetings booked.
- **Conversion Rate:** How many "Cold" leads moved to "Interested" status.
- **Weekly Review Agenda:** A 15-minute meeting structure for the founder to review the sales person's progress without getting bogged down in details.

5. First 30-Day Training Plan: A calendar for the new hire:

- **Week 1:** Product knowledge & shadow-calling.
- **Week 2:** Script roleplay & Lead Sourcing training.
- **Week 3:** First 5 independent site visits.
- **Week 4:** Performance review and pipeline cleanup.

Annexure B: The DT Research Methodology

How we move from "Referral-Only" to a "Strategic Sales Plan."Before we write a single script or hire a single person, we complete four specific documentation blocks. This ensures the execution plan is grounded in the reality of your business.

1. Positioning Strategy (The RCA-CSA Framework)

We begin by analyzing where you stand today versus where you want to be.
Root Cause Analysis (RCA): We identify why sales are currently stuck at the referral stage and what specific barriers prevent cold prospects from buying.
Current State Analysis (CSA): We document your existing win rates and the "why" behind your successful projects.
The Result: A clear statement of your **Unique Value Proposition**—why a stranger should trust you over a competitor they already know.

2. ICP Definition (Customer Archetyping)

We stop the "everyone is a customer" approach. By looking at your most profitable and smoothest referral projects, we define your **Ideal Customer Profile (ICP)**.
Data Points: We analyze company size, industry, geography, and "Buying Trigger" (the specific event that makes them need you).
The Result: A specific "Target List" profile that guides where your sales team spends 100% of their time.

3. Channel Selection (Persona Mapping)

We don't pick sales channels (Field, Phone, or Digital) based on trends; we pick them based on where your **ICP** actually spends their time.
Persona Analysis: Does your buyer answer the phone? Do they visit trade shows? Do they search on Google?
The Result: one primary channel to master first, rather than spreading resources too thin.

4. Messaging Strategy (The Funnel Talk)

We translate your technical expertise into "Buyer Language."
We map specific messages to each stage of the sales journey:
Awareness: What do we say to someone who has never heard of you?
Consideration: How do we prove your expertise compared to cheaper options?
Decision: What is the final "push" that converts a lead into a client?
The Result: A **Messaging Framework** that ensures whoever you hire sounds like a seasoned pro from day one.

Transition to Execution: Only after these four blocks are documented do we provide the Execution Blueprint (Annexure A). This sequence ensures that the hiring and outreach plans are built on a foundation of facts, not just "sales energy."

ANNEXURE C: Deliverables and Cost Breakdown

1. Deliverables

Area	Deliverable
ICP	Definition of high-potential customer types
Funnel Design	Stage-wise funnel from contact to customer
Positioning Strategy	Value proposition & differentiation
Messaging Framework	What to say, to whom, when (mapped to funnel)
Execution Options	Clear execution plan with checklists (Annexure A)

2. Pricing Structure

Role	Hours	Rate	Value
Senior Consultant	5	₹3,000/hr	₹15,000
Strategy Consultant	10	₹1,500/hr	₹15,000
Analytics Consultant	10	₹1,000/hr	₹10,000
Org Psychology Consultant	5	₹1,000/hr	₹5,000
Data Science Consultant	5	₹1,000/hr	₹5,000
Total Value			₹50,000
Offered Price (50% discount)			₹25,000

This is a fixed-scope consulting engagement. All deliverables will be shared within the 2-week period.

3. What This Engagement Does Not Include

- We do not run ad campaigns or build creatives
- We do not manage hiring or placements
- We do not operate ongoing sales/digital teams

4. Next Steps

1. Kick-off call & founder discussion (RCA-CSA)
2. Buyer research and market analysis
3. ICP, funnel, positioning, and messaging
4. Final walkthrough + execution blueprint (Annexure A)
